SUMMARY

Product designer for B2B SaaS and consumer mobile apps that move people from online to in person: restaurant bookings, in-store purchases, and meeting new people with shared interests. Designs the rules beneath the screen first, and prototypes in code with AI tools to test ideas before building.

WORK EXPERIENCE

Product Designer | Owting

San Francisco, CA (Remote) | May 2025 - Present

- Lead design for the rebrand and relaunch of an all-in-one social app for meeting people in person, bringing discovery, group chats, and events into one place, and shipping an AI planner inside the chat.
- Own features end-to-end with the CPO and engineering team, from scoping through design, handoff, and QA, prototyping interactions in code with Cursor and Claude Code.
- Audited interactions across core flows before the redesign, documenting missing states and feedback patterns that became the UX baseline for the rebuild.

Product Designer (Contract) | Eatsy

San Francisco, CA (Remote) | April 2025 - July 2026

- Redesigned the diner booking flow and reservation management SaaS for 30+ restaurants. Booking rate rose every quarter from 13% to 40%, reaching ~8,000 reservations a month with no-shows at 2-3%. Designed the auto table assignment system hosts use during service. It assigns tables by capacity and timing rules, explains why when it can't, and hands exceptions to staff, a model shaped by research with owners and floor staff.
- Built a design system in Lovable as the single source of truth for components, so the team reused shared components instead of rebuilding them as product work moved there.

Product Designer | WishMobile

Taipei, Taiwan | July 2022 - July 2023

- Shaped a SaaS CRM for beauty businesses at Oh!Bot, whose traction led WishMobile to acquire the startup. Its flexible structure let it grow beyond 3,000 beauty professionals to 1,000+ stores and 100+ consumer brands.
- Shipped a marketplace for selling account credit, vouchers, and class packages online and redeeming them in store, plus deposit-based booking. Across these releases, new revenue streams grew 27% and return rate rose 17%.
- Created customer profiles showing visit history, preferences, and lifetime value, giving merchants first-party data for segmentation and retention across locations.

UX/UI Designer | V.I.Global Partners

Seattle, WA | June 2021 - June 2022

- Led research with counselors and students to find pain points in manual Excel-based workflows, turning findings into requirements for a client management system.
- Designed task management and student overview features through rounds of usability testing, working within tight technical and resource limits on a small cross-functional team.

EDUCATION

Trine University | Master of Business Analytics | August 2023 - December 2025

University of California Davis | Bachelor of Arts in Design | September 2017 - March 2021

SKILLS

Design: Product Design, UX/UI Design, Interaction Design, Visual Design, Information Architecture, User Flows, Design Systems, Prototyping (Figma and code), Design Handoff

Research & Data: User Research, Usability Testing, Journey Mapping, A/B Testing, Business Analytics, Data Visualization

TOOLS

Figma, Cursor, Claude Code, Lovable, Miro, Jira, Tableau, Google Analytics, HTML/CSS
