SUMMARY

Product designer with 3+ years designing B2B SaaS for business operations, from restaurant reservations to retail CRM, plus consumer mobile apps. Designs the rules beneath the screen first, and prototypes in code with AI tools to test ideas before building.

WORK EXPERIENCE

Product Designer | Owting

San Francisco, CA (Remote) | May 2025 - Present

- Lead design for the rebrand and relaunch of an all-in-one social app for meeting people in person, designing across discovery, group chats, events, paid ticketing, and org profiles. Audited core flows first, documenting gaps that became the UX baseline for the rebuild.
- Shipped an AI planner inside the group chat, turning a six-step event setup across screens into one interaction.
- Own features end-to-end with the CPO and engineering team, from scoping through usability testing, handoff, and QA, prototyping interactions in code with Cursor and Claude Code.

Product Designer (Contract) | Eatsy

San Francisco, CA (Remote) | April 2025 - July 2026

- Redesigned the diner booking flow and reservation management SaaS for 30+ restaurants. Booking rate rose every quarter from 13% to 40%, reaching ~8,000 reservations a month with no-shows at 2-3%.
- Designed the automatic table assignment system hosts use during service. It assigns tables by capacity and timing rules, flags imperfect fits, and lets staff override, a model shaped by research with restaurant operators.
- Built a design system in Lovable as the team's single source of truth, so engineers and the PM reused shared components, speeding up rebuilds of the customer profile and reservation panel.

Product Designer | WishMobile

Taipei, Taiwan | July 2022 - July 2023

- Designed a SaaS CRM for beauty businesses at Oh!Bot, whose traction led WishMobile to acquire the startup. Its flexible structure let it serve 3,000+ beauty professionals and expand to 1,000+ stores and 100+ consumer brands.
- Shipped a marketplace for selling account credit, vouchers, and class packages online and redeeming them in store, plus deposit-based booking. Across these releases, revenue from online sales and prepaid packages grew 27%, and customer return visits rose 17%.
- Created customer profiles showing visit history, preferences, and lifetime value, and designed a tagging dashboard that lets merchants segment customers by tier, demographics, activity, loyalty, and spend across channels, then target promotions to specific groups, giving them first-party data for retention across locations.

UX/UI Designer | V.I.Global Partners

Seattle, WA | June 2021 - June 2022

- Led research with counselors and students to find pain points in manual Excel-based workflows, turning findings into requirements for a client management system.
- Designed task management and student overview features through rounds of usability testing, working within tight technical and resource limits on a small cross-functional team.

EDUCATION

Trine University | Master of Science in Business Analytics | August 2023 - December 2025

University of California Davis | Bachelor of Arts in Design | September 2017 - March 2021

SKILLS

Design: Product Design, UX/UI Design, Interaction Design, Visual Design, Information Architecture, User Flows, Design Systems, Prototyping (Figma and code), Design Handoff

Research & Data: User Research, Usability Testing, Journey Mapping, A/B Testing, Business Analytics, Data Visualization

TOOLS

Figma, Cursor, Claude Code, Lovable, Miro, Jira, Tableau, Google Analytics, HTML/CSS
