WORK EXPERIENCE

Product Designer | Owting

San Francisco, CA (Remote) | Contractor | May 2025 – Present

- Designed AI planner feature from concept to production-ready flows, defining how users generate event ideas and create event pages through AI assistance.
- Improved core flows (chat, events, discovery) by adding missing interaction states and visual feedback to improve clarity and task completion.
- Led website redesign in collaboration with product and development teams, establishing visual direction and brand positioning for v2 launch.

Product Designer | Eatsy

San Francisco, CA (Remote) | April 2025 – Present

- Redesigning reservation management system for 30+ independent restaurants, increasing total reservations from 20% to 53% and reducing no-show rate from 44% to 28% within three months.
- Designed operational features including time slot logic, table auto-assignment, and real-time seating, collaborating bi-weekly with engineers to balance UX quality and technical feasibility.
- Defined research strategy with PM to validate assumptions, discovering users valued information hierarchy over dense interfaces which shaped core UX decisions.

UX/UI Designer | WishMobile (following acquisition of Oh!Bot)

Taipei, Taiwan | July 2022 – July 2023

- Scaled platform post-acquisition from beauty services to multi-industry CRM (fitness, retail, wellness), designing vertical-specific appointment, subscription, and loyalty features.
- Designed deposit feature reducing no-shows for 1,200+ beauty businesses, driving 1.5× bookings and 27% revenue growth.
- Designed marketplace for prepaid session bundles and membership cards, enabling businesses to increase customer retention and capture upfront revenue through subscription models.
- Built customer profiling system tracking visit history, preferences, and lifetime value, enabling businesses to personalize services and optimize retention strategies.

UX/UI Designer | V.I.Global Partners

Seattle, WA | June 2021 – June 2022

- Designed a client management system addressing manual Excel-based workflows, conducting user research with counselors and students to identify critical pain points in task tracking and document management.
- Created task management and student overview features through iterative testing, balancing user needs with technical and resource constraints.

EDUCATION

Trine University | Master of Business Analytics | August 2023 – December 2025
